Nature Play

Description

The Sparkling Butterfly Play Panel has been described as "the most beautiful panel design". This stunningly simple design incorporates 4 different coloured polycarbonate window insert panels with contrasting frames. Polycarbonate is the perfect material for these windows, as it is virtually unbreakable and has been vigorously tested. When the sunshine passes through the coloured windows they cast the colours onto the floor in front of them. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
