Depth	19 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Tactile Stimulation

Inclusive Play

Problem Solving

Numeracy

Description

The Sunflower Sums panel has been designed with busy schools in mind. It has sliding maths sums discs which are moved from the roots of the sunflower and up to the head, where the sums take place. There is also a built in chalkboard so the children can write down the sums and the answers as they go along. All the sliding discs move easily in channels on the panel which means there are no loose parts to worry about losing or have to be put away each night. This panel can be specified with your own set of numbers so you can make the sums as easy or difficult as you like. Bespoke design options are also available. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
