Fine Motor Skills

Tactile Stimulation

Inclusive Play

Auditory Stimulation

Construction Play

Description

The Twist Bearing Play Panel contains a rotating centre. The central clear window is made from polycarbonate which is virtually unbreakable and will keep the beads safely away from children. The beads follow the track when the centre window is rotated. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
