Play Values

This product supports the following areas of child development.

Balancing

Stretching & Flexibility

Strength

Hand-eye Co-ordination

Gross Motor Skills

Climbing

Problem Solving

Co-Operative Play

Description

"Traversing" means to climb across rather than to climb up. This activity requires skill, strength and agility. The traverse walls have handholds and footholds which allow children to move along the wall. It provides a great way for children to exercise and is popular in the school playground. Traversing aids co-ordination and helps to develop upper body strength. Differing routes offer easy or difficult ways to travel stimulating the child to work out which route to take.

Traverse Walls are a great way for children to have fun and expand skills.

SAFETY SURFACING

No safety surface is required if used correctly as the critical fall height is less than 600mm. However we suggest installing surfacing if the equipment will be used without supervision.
